

CLAIMS

1. A mill 1 for seasoning, in particular for moist salt such as Guérande salt, consisting of a body 2 inside which a drive shaft 6 is articulated, and a cap 4 covering the body 2, characterized in that the drive shaft 6 has a device for breaking up the salt.
2. The mill 1 for seasoning as claimed in claim 1, characterized in that the drive shaft 6 has a screw 7 comprising notches 8.
3. The mill 1 for seasoning as claimed in one of the preceding claims, characterized in that the drive disk 5, the drive shaft 6 and the screw 7 with its notches 8 are made of plastic.
4. The mill 1 for seasoning as claimed in one of the preceding claims, characterized in that the grinding mechanism, i.e. the dish 9 and the pear 10, is made of ceramic.
5. The mill for seasoning as claimed in one of the preceding claims, characterized in that the mill is assembled using stainless steel screws.
6. The mill for seasoning as claimed in claim 5, characterized in that the assembly screws are embedded in a drop of resin.
7. The mill for seasoning as claimed in one of the preceding claims, characterized in that the lower end of the drive shaft is square.
8. The mill for seasoning as claimed in one of the preceding claims, characterized in that the drive shaft 6 has a plastic bracket 11 at its lower end.
